

Safety Accountability Across Organization

World class organizations require all employees – from the boardroom to the frontline – to take BOTH an active role and accountability in safety. This philosophy is critical in establishing a proactive and sustainable safety management system. **Safety Leadership Accountability** helps companies achieve World-Class safety by focusing on three principles of **Alignment**, **Accountability**, and **Action**. The effective integration of these principles creates an organization-wide behavior and culture where safety becomes a “frame-of-mind” and no longer relies on chance.

OneSource EHS Services
